IDENTIFIERS *Small Engine Repair

ABSTRACT

The general purpose of the occupational analysis is to provide workable, basic information dealing with the many and varied duties performed in the small engine repair occupation. The document opens with a brief introduction followed by a job description. The bulk of the document is presented in table form. Sixteen duties are broken down into a number of tasks and for each task a two-page table is presented, showing on the first page: tools, equipment, materials, objects acted upon; performance knowledge (related also to decisions, cues and errors); safety--hazard; and on the second page; science; math--number systems; and communications (performance modes, examples, and skills and concepts). The duties include: testing performance of engine; maintaining and repairing ignition, fuel system, governors, starter systems, charging system, cooling system, lubrication system, valve train, short block assemblies, crankcase breathers, exhaust system, and shop equipment and tools; storing equipment for off season; maintaining small engine powered equipment; and operating a business. A glossary of terms related to small engine repair is appended. (BP)

FOREWORD

The occupational analysis project was conducted by The Instructional Materials Laboratory, Trade and Industrial Education, The Ohio State University in conjunction with the State Department of Education, Division of Vocational Education pursuant to a grant from the U.S. Office of Education.

The Occupational Analysis project was proposed and conducted to train vocational educators in the techniques of making a comprehensive occupational analysis. Instructors were selected from Agriculture, Business, Distributive, Home Economics and Trade and Industrial Education to gain experience in developing analysis documents for sixty-one different occupations. Representatives from Business, Industry, Medicine, and Education were involved with the vocational instructors in conducting the analysis process.

The project was conducted in three phases. Phase one involved the planning and development of the project strategies. The analysis process was based on sound principles of learning and behavior. Phase two was the identification, selection and orientation of all participants. The training and workshop sessions constituted the third phase. Two-week workshops were held during which teams of vocational instructors conducted an analysis of the occupations in which they had employment experience. The instructors were assisted by both occupational consultants and subject matter specialists.

The project resulted in producing one hundred two trained vocational instructors capable of conducting and assisting in a comprehensive analysis of various occupations. Occupational analysis data were generated for sixty-one occupations. The analysis included a statement of the various tasks performed in each occupation. For each task the following items were identified: tools and equipment; procedural knowledge; safety knowledge; concepts and skills of mathematics, science and communication needed for successful performance in the occupation. The analysis data provided a basis for generating instructional materials, course outlines, student performance objectives, criterion measures as well as identifying specific supporting skills and knowledge in the academic subject areas.

PREFACE

The overall scope of this project was to analyze the different tasks that a Small Engine Mechanic performs in the job. The steps under each task are only specific enough to help select the subject matter for writing a course curriculum. It should be understood that this is a document that another Small Engine Instructor or Mechanic could use to gather information for writing curriculum and is not intended to be used to teach from directly.

It is felt that the main duty of a small engine mechanic is to repair the engine and in this document, the equipment that the engine is used on and the business operating aspects are secondary. The duties of maintaining equipment and business procedures were done very generally and could be separate task analyses of their own.

Because of the complexity and depth of the material covered, it was not possible to handle all of the material in proper sequence.

We hope that our efforts will be of value to other people in the teaching and small engine professions.

ACKNOWLEDGMENT

We wish to acknowledge the valuable assistance rendered by the following subject matter specialists. They provided input to the vocational instructors in identifying related skills and concepts of each respective subject matter area and served as training assistants in the analysis process during the two-week workshops.

JOB DESCRIPTION

The small engine repair mechanic's main duties are to troubleshoot, maintain and repair air and water cooled engines used on different types of equipment such as lawn and garden equipment, agriculture equipment, off-the-road equipment, recreational equipment, etc. The mechanic's other duties are to maintain and repair the equipment that the engines are used on and establish and maintain customer relations. Other aspects that a mechanic has knowledge of is purchasing and selling of engines, equipment and parts, buying and maintaining tools and ship equipment and keeping business records.

Duty A Testing Performance of Engine

1 Start and operate engine
2 Determine cause of engine knock or ping
3 Operate dynamometer

//

(TASK STATEMENT) START AND OPERATE ENGINE

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Operators manual Engine Gasoline Oil Mechanic's tool set (see appendix) Measuring cup Fuel container	Read operator's manual Prepare engine for starting Start engine Operate engine	Safety glasses Proper dress Ear protection Safety standard equipment (see appendix) Clean area Disengage clutch Personal injury from operating engine and equipment Fire potential Exhaust

DECISIONS	CUES	ERRORS
Decide type of fuel and oil and amount Decide if fuel shut off value is on and how to choke or prime Determine if ignition is on	Operator's manual Fuel/Oil ratios Position of switch	Damage engine Engine will not start Engine will not start

(TASK STATEMENT) START AND OPERATE ENGINE

SCIENCE	MATH – NUMBER SYSTEMS
Simple machines used to gain mechanical advantage [Screwdriver for checking oil] Centrifugal forces developed by bodies in rotation [Rotating engine] Inertia and momentum [Reciprocating parts]	Positive rationals Use of Numbers (without calculation) Indexing [Use of operators manual] Basic Arithmetic Skills and Concepts Ratio and proportion [Fuel/Oil mixtures] Measurement: non-geometric Liquid [Liquid measurement]

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Reading	Operators manual	Comprehension, Process - Instructional

(TASK STATEMENT) DETERMINE CAUSE OF ENGINE KNOCK OR PING

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Engine Load source	Operate engine Apply load source Analyze results	Safety glasses Proper dress Ear protection Safety standard equipment (see appendix) Moving parts Fire

DECISIONS	CUES	ERRORS
Decide location of noise Decide type of noise	Knock in crankcase or cumbustion chamber Knock in combustion chamber Sound of noise	Repair of wrong part Wasted time

(TASK STATEMENT) DETERMINE CAUSE OF ENGINE KNOCK OR PING

SCIENCE	MATH – NUMBER SYSTEMS
Simple machines used to gain mechanical advantage [Levers] Centrifugal forces developed by bodies in rotation [Rotating engine] Inertia and momentum [Reciprocating parts]	Basic Logic Deductive and inductive [Deductive reasoning]

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Listening	Running engine	Noise discrimination

(TASK STATEMENT) OPERATE DYNAMOMETER

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Dynamometer Engine Paper and pencil	Prepare dynamometer and engine Start and warm up engine Apply load and record data Interpret test data	Safety glasses Proper dress Ear protection Safety standard equipment (see appendix) Noise Fire Moving parts Physical burns

DECISIONS	CUES	ERRORS
Decide proper connections Decide when engine is warm Decide speed and load Decide which formula to use Decide if engine is within manufacturer specifications	Operators manual for dynamometer Time Manufacturer's rated horse power at rated revolutions per minute Specifications Operator's manual 80% - 90% rated horse power	Improper reading Accidents Lubrication failure False torque reading False horse power

(TASK STATEMENT) OPERATE DYNAMOMETER

SCIENCE	MATH – NUMBER SYSTEMS
Function of Dynamometer Simple machines used to gain mechanical advantage [Torque arm on dynamometer] Work input, work output, friction and efficiency in simple machines [Principles of dynamometer] Fluids under pressure [Hydraulic pressure in dynamometer]	Whole numbers Positive fractions and decimal fractions Use of Numbers (without calculation) Recording [Recording data] Fundamental Operations (Calculation) Addition, Subtraction, Multiplication, Division [Compute formula] Basic Arithmetic Skills and Concepts Reduction of fractions, Finding a percent of a number and what percent one number is of another, Changing fractions to decimal and decimals to fractions [Computing horse power] Instruments: [Tachometer] Measurement: non-geometric Speed [Force] Time Estimating horse power Computing cubic inch displacement Computing compression ratio

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Reading	Operator's manual	Comprehension, Informational reports, Terminology, Process-Instructional
Writing	Data	Penmanship
Listening	Engine overload	Noise discrimination

Duty B Maintaining and Repairing Ignition

1 Test ignition output
2 Test ignition components
3 Replace ignition components
4 Adjust and test ignition timing

18

(TASK STATEMENT) TEST IGNITION OUTPUT

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Spark jump gap tool	Connect tool Pull engine through and observe spark Evaluate spark	Safety glasses Proper dress Ear protection Safety standard equipment (see appendix) Potential shock Personal injury
DECISIONS	**CUES**	**ERRORS**
Determine if spark is satisfactory	Brightness and color, distance and size, and sound	Poor or no performance

61

(TASK STATEMENT) TEST IGNITION OUTPUT

SCIENCE	MATH – NUMBER SYSTEMS
Resistance of materials to flow of electrical current [Air resistance to current flow, air gap size related to voltage requirements. and function of insulating materials]	Fractions and decimal fractions Measurement: geometric Linear [Spark gap] Basic Logic Deductive/Inductive [Deductive reasoning]

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Viewing	Spark	Visual analysis
Listening	Spark	Auditory discrimination

(TASK STATEMENT) TEST IGNITION COMPONENTS

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Mechanic's tool set (see appendix) Ignition analyzer Continuity tester Service manual Components Points Condenser Coil Rotor Distributor Wires Pulse pack Switches	Check manufacturer's specifications Test components for proper function and values Evaluate test results and determine item to be replaced	Safety glasses Proper dress Ear protection Safety standard equipment (see appendix) Personal injury Shock potential Shorts Equipment damage
DECISIONS	**CUES**	**ERRORS**
Decide if components are satisfactory	Test results compared with manufacturer specifications	Poor performance Early failure

(TASK STATEMENT) TEST IGNITION COMPONENTS

SCIENCE	MATH – NUMBER SYSTEMS
Magnetic fields of force [Magnetic field of coil] Resistance of materials to flow of electrical current [Electrical connections and insulation] Functions of ignition tester	Whole numbers and decimal fractions Use of Numbers (without calculation) Counting, Indexing [Service manuals] Instruments [Volt Ohm's meter] Measurement: non-geometric [Electrical measure]

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Reading Viewing	Locating information Meters	Terminology Visual analysis, Detail/Inference

22

(TASK STATEMENT) REPLACE IGNITION COMPONENTS

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Mechanic's tool set (see appendix) Flywheel pullers Air Cleaning solution Lubricant Service manual Parts manual Spark plug chart Parts Plugs Points Condenser Coils Wires Pulse pacts Switches Rotor Cam wick	Pick items from supply source Install items Adjust as required to specifications Test run	Safety glasses Proper dress Ear protection Safety standard equipment (see appendix) Shock and burns

DECISIONS	CUES	ERRORS
Decide which components are correct or should be used Determine specifications	Parts manual, Spark plug chart, specific use of equipment Manufacturer's manual	Poor performance, damaged equipment Poor performance, would not run

23

(TASK STATEMENT) REPLACE IGNITION COMPONENTS

SCIENCE	MATH – NUMBER SYSTEMS
Transfer of heat form one body to another [Select spark plug heat range] Resistance of materials to flow of electrical current [Avoid short circuits, clean and tighten connections] Function of ignition components	Whole numbers Fractions and decimals Use of Numbers (without calculation) Counting, Ordering, Indexing, Coding, Measurement [Uses parts manual] Instruments [Feeler gauge] Measurement: geometric Linear [Point gap] Read and interpret tables, charts and graphs [Specification charts]

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Reading	Parts manual	Locate information
	Service manual	Locate information
Touching	Adjust points	Drag

(TASK STATEMENT) ADJUST AND TEST IGNITION TIMING

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Mechanic's tool set (see appendix) Timing light Continuity tester Timing fixture Service manual Parts Centrifugal advance Vacuum advance Timing fixtures Degree wheel	Check manufacturer's specifications Clean and set points on dwell Check timing marks on gears, belts, impulse couplings and starter plates Make timing adjustments Check timing advance devices Synchronize ignition to carburetion	Stay clear of rotating parts Personal injury Damaged equipment

DECISIONS	CUES	ERRORS
Decide to set point gap and then timing Decide which procedure to follow	Point gap effects timing Manufacturer's procedures and equipment available	Incorrect timing Accuracy of setting

(TASK STATEMENT) ADJUST AND TEST IGNITION TIMING

SCIENCE	MATH – NUMBER SYSTEMS
Simple machines used to gain mechanical advantage [Simple machines, screwdriver, incline plane on point cam] Addition and subtraction of whole numbers [Synchronize, timing relation of spark to piston position and carburetion]	Integers Fractions/Decimals Basic Arithmetic Skills and Concepts Reduction of fractions, Changing fractions to decimal and decimals to fractions [Piston location] Instruments [Steel rule] Measurement: geometric Linear [Piston location], Angle [Crankshaft rotation] Measurement: non-geometric Time

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Reading Touching	Service manual Adjust points	Terminology Drag

Duty C Maintaining and Repairing Fuel System

1 Service or replace air cleaner
2 Adjust carburetor
3 Inspect, repair, or replace carburetor
4 Inspect, repair or replace fuel tank
5 Inspect, repair or replace fuel line
6 Inspect, service or replace fuel filter
7 Test, repair or replace fuel pump
8 Mix fuel and oil mixtures and refuel engine
9 Inspect and service intake manifold

27

(TASK STATEMENT) SERVICE OR REPLACE AIR CLEANER

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Mechanic's tool set (see appendix) Service manual Cleaning solvent Brush Air Rag Detergent soap Water New filter	Inspect air cleaner Select method of cleaning Clean and service or replace air cleaner	Use correct solvent Safety glasses Proper dress Ear protection Safety standard equipment (see appendix) Fire Air Solvents

DECISIONS	CUES	ERRORS
Determine whether to replace or clean air cleaner Determine to service or replace Determine correct filter to use Determine method of cleaning	Condition of air cleaner Type of air cleaner Manufacturer's recommendations Time of service Type of engine Type of parts manual	Damage to air cleaner Damage to engine Poor fuel consumption

(TASK STATEMENT) SERVICE OR REPLACE AIR CLEANER

SCIENCE	MATH – NUMBER SYSTEMS
Simple machines used to gain mechanical advantage [Screwdriver for removing screws, gasoline can break down air cleaner through continuous flooding] Function of air cleaner	Measurement: non-geometric Liquid [Liquid measurement] Positive rationals Basic Arithmetic Skills and Concepts Ratio and proportion [Cleaning solution]

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Reading	Service manual	Locating data, Comprehension
	Parts manual	Locating data, Terminology, Detail
Viewing	Condition of Air cleaner	Analyze condition Comparing used to new

(TASK STATEMENT) ADJUST CARBURETOR

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Mechanic's tool set (see appendix) Service manual Tachometer Load source	Make initial manufacturer's recommended adjustment Operate engine under normal revolutions per minute; load and adjust high speed mixture screw and high speed limit screw Idle engine at manufacturer's recommended revolutions per minute; adjust idle mixture and idle stop screw	Safety glasses Proper dress Ear protection Safety standard equipment (see appendix) Keep hands from moving parts Operating engine Moving parts

DECISIONS	CUES	ERRORS
Determine type of carburetor Determine which screw is high speed mixture, low speed mixture and idle stop screw Determine which way to turn screw	Where screws should be set before starting engine Position of screw Performance and revolutions per minute of engine Black smoke from exhaust	Engine will not start Loss of power Overheating Eratic operation

(TASK STATEMENT) ADJUST CARBURETOR

SCIENCE	MATH – NUMBER SYSTEMS
Simple machines used to gain mechanical advantage [Use of screwdriver] Fluids under pressure [Pushing of fuel through nozzle by differential of pressure] Function of carburetion	Use of Numbers (without calculation) Ratio Measurement: non-geometric Speed Rate ''Measure sense''/role of ''unit'' Rational numbers Instruments Tachometer

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Reading	Manufacturer's specifications Tachometer	Comprehension, Locate data Speed/Rate
Viewing	Position of screw	Rotation Exhaust
Listening	Engine Performance	Noise discrimination
Touching	Engine, screws	Vibration, tightness

(TASK STATEMENT) INSPECT, REPAIR OR REPLACE CARBURETOR

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Gasoline Squirt can Paper and pencil Mechanic's tool set (see appendix) Service manual Carburetor cleaning solvent Gauges Drill bits 6-inch steel scale Air Carburetor parts	Test for fuel getting to combustion chamber Diagram linkage hook-up before removal Remove carburetor Disassemble carburetor Analyze carburetor Clean and make repairs to carburetor Assemble and install carburetor	Safety glasses Proper dress Ear protection Safety standard equipment (see appendix) Solvents Air (see appendix) Flamable materials

DECISIONS	CUES	ERRORS
Determine test method Determine sequence in removing of parts Determine if carburetor is to be cleaned, rebuilt or repaired Determine method of cleaning Determine manufacturer's specifications Determine correct parts to use	Ways to administer fuel or find out if fuel is in combustion chamber Type of carburetor Condition of carburetor Position of floats Position of adjusting screws Type of engine and carburetor	Repair carburetor unnecessarily when fault may be in other part of engine Damage to carburetor Improper operation of carburetor Parts will not fit

(TASK STATEMENT) INSPECT, REPAIR OR REPLACE CARBURETOR

SCIENCE	MATH – NUMBER SYSTEMS
Simple machines used to gain mechanical advantage [Screwdriver/lever] Function of carburetor Effect of heating and cooling on state of matter [Vaporization of fuel] Fluids under pressure [Effects of atmospheric pressure on fuel] Forces acting on a body immersed or floating in a liquid [Force that raises float] Motion resulting from two or more forces acting on a point in a body [Float push needle against seat - closing fuel pressure] Corrosion - gums - rust Function of carburetion	Positive fractions Basic Arithmetic Skills and Concepts Reduction of fractions Fractions to decimals Fundamental Operations (Calculation) Addition, Subtraction Measurement: geometric Linear [inches] Instruments [Gauges, steel tape] Use of Numbers Counting, Ordering, Indexing, Coding, Measurement [Parts manual] Basic Logic Deductive reasoning

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Reading	Service manual	Comprehension, Process, Description, Information
	Parts manual	Detail, Terminology
Viewing	Carburetor condition	Visual analysis
Smelling	Fuel	Odor of bad fuel
Touching	Float adjustment	Drag

(TASK STATEMENT) INSPECT, REPAIR OR REPLACE FUEL TANK

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Mechanic's tool set (see appendix) Cleaning solvents Steam cleaning Solder and soldering iron Torch Epoxy Sheet metal screws O-ring Rocks Glass bead blasting Air	Inspect fuel tank Analyze condition of fuel tank Clean, repair or replace fuel tank	Safety glasses Proper dress Ear protection Safety standard equipment (see appendix) Dirt Gasoline Air (see appendix)
DECISIONS	**CUES**	**ERRORS**
Determine method of repair or if replacement is necessary	Dirt, rust, leaks, gum and plugged vent Availability of equipment Type of leak or damage Type of material tank is made from	Waste of time Other damage to tank

34

(TASK STATEMENT) INSPECT, REPAIR OR REPLACE FUEL TANK

SCIENCE	MATH – NUMBER SYSTEMS
Effect of heating and cooling on expansion of materials [Soldering and brazing] Transfer of heat from one body to another [Soldering] Corrosion - rust - gums - varnish Simple machines used to gain mechanical advantage [Lever, screwdriver] Function of carburetion	Measurement: non-geometric Temperature Positive rationals [Properties of solder] Deductive/Inductive [Deductive reasoning]

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Smelling	Fuel tank	Odor of gum and varnish
Viewing	Tank and dirt	Visual analysis
Touching	Soldering	Temperature
	Mixing epoxy	Texture
Listening	Tap on tank	Determination of material
Reading	Parts manual	Comprehension, Terminology

(TASK STATEMENT) INSPECT, REPAIR OR REPLACE FUEL LINE

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Fuel container Mechanic's tool set (see appendix) Tubing cutter Flaring tool Air Copper line Neopreme line Compression fittings	Inspect condition of fuel line Analyze condition Repair or replace fuel line	Safety glasses Proper dress Ear protection Air (see appendix) Safety standard equipment (see appendix)

DECISIONS	CUES	ERRORS
Determine what type of repair is needed or replacement Determine method of repair	Leaks, dirt, plugged or kinked Type of connections Material of lines Tools and material available	Other damage to line Future trouble with engine

(TASK STATEMENT) INSPECT, REPAIR OR REPLACE FUEL LINE

SCIENCE	MATH – NUMBER SYSTEMS
Simple machines used to gain mechanical advantage [Pliers to remove clamp] Effect of heating and cooling on state of matter [Vapor lock in fuel line] Resistance of materials to change in shape [Flaring tubing] Function of fuel line	Whole Numbers Positive fractions Measurement: geometric Linear Basic Logic Deductive reasoning

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Viewing	Condition of line	Visual analysis

(TASK STATEMENT) INSPECT, SERVICE OR REPLACE FUEL FILTER

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Mechanic's tool set (see appendix) Service manual Cleaning solvents Fuel container Air Fuel filter	Visually inspect filter and test fuel flow Analyze condition of filter Clean and/or replace filter	Safety glasses Proper dress Ear protection Fire extinguisher Safety standard equipment (see appendix) Combustion of fuel

DECISIONS	CUES	ERRORS
Determine to service or replace Determine method of cleaning Determine correct part	Dirt, time in service, absence of fuel or small amount of flow of fuel, damaged filter or type of filter Type of engine and filter Manufacturers recommendations	Poor engine performance Part will not fit

(TASK STATEMENT) INSPECT, SERVICE OR REPLACE FUEL FILTER

SCIENCE	MATH – NUMBER SYSTEMS
Simple machines used to gain mechanical advantage [Use of pliers removing clamps] Forces acting on a body immersed or floating in a liquid [Water and dirt - settle in sediment bowl] Function of fuel filter	Whole Numbers Use of Numbers (without calculation) [Finding parts] Counting, Indexing, Ordering, Coding Deductive/Inductive [Deductive reasoning] Basic Arithmetic Skills and Concepts Ratio and proportion [Cleaning solutions]

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Viewing Reading	Condition of filter Parts number Parts manual	Analysis Memory Detail

(TASK STATEMENT) TEST, REPAIR AND REPLACE FUEL PUMP

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Mechanic's tool set (see appendix) Service manual Measuring cup Pressure - vacuum gauge	Read manufacturer's specifications and procedures Test flow of fuel Test pressure and vacuum Evaluate test results Repair or replace pump	Safety glasses Proper dress Ear protection Safety standard equipment Fuel combustion

DECISIONS	CUES	ERRORS
Decide if fuel pump is within manufacturer's specifications Decide to repair or replace Determine which parts or pump to use	Type of fuel pump Rate of flow, low pressure, low vacuum availability of parts Dirty fuel system Type of engine	Poor engine operation Wrong parts or pump

(TASK STATEMENT) TEST, REPAIR AND REPLACE FUEL PUMP

SCIENCE	MATH – NUMBER SYSTEMS
Simple machines used to gain mechanical advantage [Use of pliers for removing clamps] Pressure differential - Pressure per square inch - from pumping action Forces acting on a body immersed or floating in a liquid [Force acting upon bodies opening and closing of valve] Function of fuel pump	Use of Numbers (without calculation) Counting, Ordering, Indexing, Coding, Recording [Ordering parts] Whole Numbers Measurement of pressure Measurement of vacuum - inches Read and interpret tables, charts and graphs [Specification charts] Basic Logic Deductive reasoning

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS

Duty D Maintaining and Repairing Governors

1 Inspect and test governor operation
2 Adjust governor
3 Repair or replace governor

46

(TASK STATEMENT) INSPECT AND TEST GOVERNOR OPERATION

47

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Tachometer Service manual Load source	Inspect linkage Check revolutions per minute specifications Connect tachometer Operate engine Read tachometer Apply load Observe tachometer response	Safety glasses Proper dress Ear Protection Operating engine
DECISIONS Select best type tachometer Evaluate tachometer readings	**CUES** Ease of use, time factor Revolutions per minute to: high low fluctuates recovers	**ERRORS** Wasted time, false revolutions per minute readings Engine damage, poor performance

47

(TASK STATEMENT) INSPECT AND TEST GOVERNOR OPERATION

SCIENCE	MATH – NUMBER SYSTEMS
Centrifugal forces developed by bodies in rotation [Centrifugal force working against force of spring] Motion resulting from two or more forces acting on a point in a body [Governor force working against spring force] Function of governor	Counting Numbers Whole Numbers Use of Numbers (without calculation) Counting, Recording Fundamental Operations (Calculation) Addition, Subtraction Rate Measurement: non-geometric Speed Instruments Tachometer Read and interpret tables, charts and graphs [Revolutions per minute, specification charts]

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Reading Listening Viewing	Service manual Tachometer Engine Carburator throttle	Comprehension, Information Detail Noise discrimination Visual analysis

(TASK STATEMENT) ADJUST GOVERNOR

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Mechanic's tool set (see appendix) Service manual Special tool Tang bending tool Gauges Governor springs	Check manufacturer's specifications, specific procedure, revolutions per minute Adjust linkage Adjust spring tension	Safety glasses Proper dress Ear protection Injury from over-speeding engine

DECISIONS	CUES	ERRORS
Determine position of throttle Determine direction - increase or decrease tension of spring	Type of equipment and engine Freeplay in linkage Speed of engine	Incorrect revolutions per minute Eratic operation

(TASK STATEMENT) ADJUST GOVERNOR

SCIENCE	MATH – NUMBER SYSTEMS
Function of governors Centrifugal forces developed by bodies in rotation [Fly-weights working against spring] Motion resulting from two or more forces acting on a point in a body [Air working against spring] Simple machines used to gain mechanical advantage [Pliers as simple lever]	Whole Numbers Positive fractions and decimals Fundamental Operations (Calculation) Addition, Subtraction Basic Arithmetic Skills and Concepts Reduction of fractions, Changing fractions to decimal and decimals to fractions Measurement: geometric Linear Read and interpret tables, charts and graphs [Revolutions per minute, specification charts]

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Reading	Service manual	Comprehension, Informational report, Process report, Instruction

(TASK STATEMENT) REPAIR OR REPLACE GOVERNOR

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Mechanic's tool set (see appendix) Parts Service manual Special tools as required Paper and pencil Links Springs Air vane Fly-weights Governor spool Bell crank	Diagram linkage before removal Remove governor Evaluate repairs needed Repair or replace governor	Safety glasses Proper dress Ear protection

DECISIONS	CUES	ERRORS
Determine repairs required Decide to repair or replace	Loose, worn, damaged or binding linkage Time and cost	Poor performance Too costly

(TASK STATEMENT) REPAIR OR REPLACE GOVERNOR

SCIENCE	MATH – NUMBER SYSTEMS
Simple machines used to gain mechanical advantage [Pliers used as simple lever, bellcrank used as lever] Centrifugal forces developed by bodies in rotation [Fly-weights - working against spring] Motion resulting from two or more forces acting on a point in a body [Air working against spring] Function of governor	Whole Numbers Positive fractions and decimals Fundamental Operations (Calculation) Addition, Subtraction Basic Arithmetic Skills and Concepts Reduction of fractions, Changing fractions to decimal and decimal to fractions Measurement: geometric Linear Basic Logic Deductive/Inductive [Deductive reasoning] Measurement: non-geometric Time
